## Anfree (Flupentixol + Melitracen)

Therapeutic Group : Antipsychotic, Neurotonic & Sedative

Flupentixol-a neuroleptic with anxiolytic and antidepressant properties of its own when given in small doses, and Melitracen - a bipolar thymoleptic with activating properties in low doses. In combination, the compounds render a preparation with antidepressant, anxiolytic and activating properties. Maximal serum concentration is reached in about 4 hours after oral administration of Flupentixol and in about 4 hours after oral administration of Melitracen. The biological half-life of Flupentixol is about 35 hours and that of Melitracen is about 19 hours. The combination of Flupentixol and

**Melitracen does not seem to influence the pharmacokinetic properties of the individual compounds.**

▲ Presentation: ()

Anfree Tablet: Each tablet contains Flupentixol Dihydrochloride BP equivalent to Flupentixol 0.5 mg and Melitracen Hydrochloride INN equivalent to Melitracen 10 mg.

▲ Indications: ()

Different types of anxiety, depression & apathy. These include- psychogenic depression, depressive neuroses, masked depression, psychosomatic affections accompanied by anxiety and apathy, menopausal depressions, dysphoria and depression in alcoholics and drug-addicts.

▲ Dosage & Administration: ()

Adults: Usually 2 tablets daily; morning and noon. In severe cases the morning dose may be increased to 2 tablets.

Elderly: 1 tablet in the morning.

Maintenance dose: Usually 1 tablet in the morning. In cases of insomnia or severe restlessness additional treatment with a sedative in the acute phase is recommended.

▲ Contraindications: ()

The immediate recovery phase after myocardial infarction, Defects in bundle-branch conduction, Untreated narrow angle glaucoma, Acute alcohol, barbiturate and opiate intoxications, Flupentixol-Melitracen should not be given to patients who have received a MAO-inhibitor within two weeks. Not recommended for excitable or overactive patients since its activating effect may lead to exaggeration of these characteristics.

▲ Warning & Precautions: ()

If previously the patient has been treated with tranquilizers with sedative effect these should be withdrawn gradually.

---

▲ Side effects: ()

In the recommended doses side effects are rare. These could be transient restlessness and insomnia.

---

▲ Drug interaction: ()

Flupentixol-melitracen may enhance the response to alcohol, barbiturates and other CNS depressants. Simultaneous administration of MAO-inhibitors may cause hypertensive crises. Neuroleptics and thymoleptics reduce the antihypertensive effect of guanethidine and similar acting compounds and thymoleptics enhance the effects of adrenaline and noradrenaline.

---

▲ Use in special groups: ()

Use in pregnancy & lactation: Flupentixol-Melitracen should preferably not be given during pregnancy and lactation.

---

▲ Packing: ()

Anfree Tablet: Each box contains 100's tablets in blister pack.

---
