

Hyloron

Sodium Hyaluronate BP 0.2%
Sterile Eye Drops

Composition:

Hyloron Sterile Eye Drops: Each ml contains Sodium Hyaluronate BP 2 mg.

Preservative:

Sodium Perborate BP 0.02%.

Pharmacology:

Sodium Hyaluronate is a natural polymer with viscoelastic property that lubricates and hydrates the surface of the eye.

Indications:

It is indicated for all forms of dry eye and for post-surgical lubrication. Hyloron is also indicated for contact lens induced dry eyes.

Dosage & administration:

Instill 1 drop 3 times daily. If necessary this can be increased or as directed by the physician.

Contraindications:

Known hypersensitivity to any of the components.

Side effects:

Transient burning sensation, temporarily blurred vision etc. may occur.

Precautions:

To avoid contamination, the tip of the container should not touch any surface and should be fully closed between applications.

Use in special group:**Use in pregnancy & lactation:**

Pregnancy category B. Reproductive studies have not demonstrated any risk, but no controlled studies in pregnant women are available. Sodium Hyaluronate has a purely physical effect on the eyes without being absorbed and hence can be used during pregnancy and lactation.

Use in children: Sodium hyaluronate 0.2% eye drops are suitable for children of all age groups.

Storage:

- Store in a cool and dry place, protect from light.
- Do not use longer than 30 days after first opening.
- Keep out of the reach of children.

Packing:

Hyloron Sterile Eye Drops: Each plastic dropper bottle contains 10 ml sterile eye drops.
