

Atropine Sulfate 0.01% **Ophthalmic Solution** 

# Composition:

Aristopin Ophthalmic Solution: Each ml contains Atropine Sulfate USP 0.1 mg.

### Preservative:

Benzalkonium Chloride.

### Pharmacology:

The active ingredient of atropine is atropine sulfate monohydrate. It reduces the rate of unwanted changes in the eye which may slow the progression of near sightedness (myopia).

#### Indications:

Aristopin is indicated to control progression of myopia in paediatric patients (4-14 years).

# **Dosage And Administration:**

One drop topically in eye(s) once at night.

### Contraindications:

Persons with glaucoma or a tendency toward glaucoma, and with hypersensitivity to belladonna alkaloids.

### Precautions:

- · For ophthalmic use only.
- Excessive use may produce symptoms of systemic atropine poisoning.
- Only paediatric use.

#### Side Effects:

- · May be associated with stinging sensation on instillation.
- May cause allergy (itch, irritation, and redness), blurring of near vision and glare in some children.

### **Drug Interaction:**

Atropine Ophthalmic Solution may interact with monoamine oxidase inhibitors (MAOIs).

### Symptoms And Treatment for Over dosage:

Excessive use or hyper susceptibility to belladonna alkaloids may produce symptoms of atropine poisoning (palpitation, hot dry skin, dizziness, tremor, unsteady gait and change in level of consciousness). Should consult a physician if your child demonstrates these symptoms.

### Storage:

- Store below 30° C temperature in a dry place, protect from light.
- Do not use longer than 30 days after first opening.
- Keep out of the reach of children.

# Packing:

Aristopin Ophthalmic Solution: Each LDPE dropper bottle contains 5 ml Sterile Eye Drops.
